EXPERIENCE

Stackline | Seattle, WA

Jul 2024 - Present

Full Stack Software Engineer | AWS Lambda, AWS Redshift, AWS DynamoDB, Node.js, React, React Native, C#, Go

- Redesigned Amazon Vendor Central and Amazon Seller Central crawlers using custom Chrome browser automation, migrating architecture to a state-machine-based system that reduced erroneous crawls by 40% and improved reliability
- Architected and built distributed server-side checkout system offering checkout-as-a-service to enterprise clients, processing 600,000+ orders annually with 99.9% uptime
- Designed and implemented time-zone-aware scheduling microservice for Amazon Ads campaign management using Go and TypeScript, automating 100,000+ campaign operations monthly
- Built parallel execution framework for content-generation workflows that increased system throughput by 400% while maintaining ACID data consistency across distributed systems

Breaking Hits | Los Angeles, CA

Oct 2023 – Jul 2024

Founding Full Stack Engineer | Python, Tensorflow, PyTorch, NumPy, Pandas, SKLearn

- Built production ML pipelines processing 100,000+ audio tracks daily using Wav2Vec and BERT models, improving music content classification accuracy by 25% and reducing manual tagging

Edenspiekermann | Los Angeles, CA

Mar 2023 – Sep 2023

Full Stack Software Engineer | Typescript, Java, C++, Kotlin, React Native, Next.js, AWS, GraphQL, Firebase

- Led development of production Next.js applications for banking and biotech enterprise clients, significantly improving performance metrics, system reliability, and observability monitoring over legacy systems
- Built reusable UI component library in TypeScript with comprehensive documentation used across 5+ projects, reducing frontend development time by 30% and ensuring design consistency

PROJECTS

Real-Time Trading Infrastructure | Python, Rust

- Engineered low-latency market data pipeline capable of handling 10,000+ events per second with sub-100 millisecond processing latency for high-frequency trading applications
- Designed automated risk management system utilizing thin-book market-making strategies, cross-exchange arbitrage detection, and regime-switching models to minimize downside exposure

AI Hedge Fund | Flask, Next.js, LangChain, Pandas, NumPy

- Built production financial data pipeline ingesting real-time market feeds from multiple cryptocurrency and equity exchanges with sub-second data freshness guarantees
- Designed LLM-powered autonomous research agents capable of automating complex financial analysis tasks, reducing manual research time by 10+ hours per week for portfolio managers

SKILLS

Languages: JavaScript (ES6+), Python 3, TypeScript, Rust, Kotlin, Java, C++, C# (.NET Core), SQL, Go

Frameworks: TensorFlow, PyTorch, React.js, Next.js, Node.js, Express, Vue.js, React Native, Flask, FastAPI

Technologies: Docker, Kubernetes, Google Cloud Platform (GCP), Amazon Web Services (AWS), REST APIs, GraphQL, Git, CI/CD, Redis, Kafka

EDUCATION

University of California, Riverside | GPA: 3.90

Sep 2018 – Jun 2022
