EXPERIENCE

Stackline

Jul 2024 - Present

Full Stack Software Engineer | React, Node.js, AWS, GraphQL, Kafka, C#, Go

- Redesigned Amazon Vendor/Seller Central crawlers with Chrome automation & fault-tolerant state-machine, cutting erroneous crawls 40% and ensuring 100% webhook/API data integrity for downstream analytics
- Architected high-availability checkout-as-a-service (600k+ orders/yr, 99.9% uptime) with exponential backoff, circuit breakers & autoscaling, patterns reused for data processing systems
- Delivered timezone-aware campaign-management microservice automating 100k+ Amazon Ads ops/mo via idempotent REST/GraphQL APIs and Kafka event streams
- Built parallel execution framework that 4x content-generation throughput, leveraged for downstream AI systems

Breaking Hits

Oct 2023 - Jul 2024

Founding Full Stack Engineer | Python, TensorFlow, PyTorch, NumPy, Pandas

- Constructed ML pipelines (Python, TensorFlow, PyTorch) processing 100k+ audio tracks/day, boosting classification accuracy 25% for AI-driven content systems

Edenspiekermann

Mar 2023 - Sep 2023

Full Stack Software Engineer | TypeScript, React Native, Next.js, AWS, GraphQL, Java, C++

- Integrated REST/GraphQL APIs & observability monitoring across client data stacks, raising funnel data reliability for downstream data systems
- Authored reusable TypeScript component library, cutting frontend build time 30% and accelerating v1 delivery of internal tooling

PROJECTS

AI Hedge Fund | Flask, Next.js, LangChain, Pandas, NumPy

- Built production financial data pipeline ingesting real-time market feeds from multiple cryptocurrency and equity exchanges with sub-second data freshness guarantees
- Designed LLM-powered autonomous research agents automating complex financial analysis tasks, reducing manual research time by 10+ hours per week for data analysis workflows

Real-Time Trading Infrastructure | Python, Rust

- Engineered low-latency market data pipeline handling 10,000+ events/second with sub-100ms processing latency for real-time data applications
- Designed automated risk management system utilizing thin-book market-making strategies, cross-exchange arbitrage detection, and regime-switching models

SKILLS

Languages: Python 3, TypeScript, JavaScript (ES6+), Go, Rust, Kotlin, Java, C++, C#, SQL

Frameworks: React.js, Next.js, Node.js, Express, Flask, FastAPI, TensorFlow, PyTorch, Vue.js, React Native, Flutter

Technologies: AWS, GCP, Docker, Kubernetes, CI/CD, Git, Redis, REST APIs, GraphQL, Kafka

EDUCATION

University of California, Riverside | GPA: 3.89

Sep 2018 – Jun 2022
